SUMMARY

I hold a double international PhD in *Philosophy* and in *Basic Sciences and Applications* (University of the Basque Country, Spain; University of Urbino, Italy, 2021). My research combines early Neopositivism, the history of the philosophy of science, conceptual engineering, and science and technology studies. I specialized in the philosophy of the early Rudolf Carnap. Thanks to my track records, I obtained the Italian habilitation as Associate Professor in Theoretical Philosophy (2025–2034) after only two years of postdoctoral work. I also have experience in interdisciplinary laboratory research at the intersection of philosophy and ontology engineering, as well as in archival research and the translation of unpublished manuscripts.

KEYWORDS

Neopositivism, Epistemology, Rudolf Carnap, Conceptual Engineering, History of Philosophy of Science, Conceptual a priori.
